Process and Machinery Industry

More details

Introduction to IEC 61508: Functional Safety of E/E/PE Safety-Related Systems (DE0101)

Introduction to Functional Safety, Functional Safety Management and Safety Lifecycle acc. to IEC 61508, Documentation and tracing, Safety concepts, designs and architectures... [More details](#)

Development of safety related Systems and Hardware, Verification and Testing acc. to IEC61508 (DE0102)

E/E/PE system safety lifecycle requirements, systematic and random faults, fault control, safety relevant parameters... [More details](#)

Development of safety related Software, Verification & Testing acc. to IEC 61508 (DE0103)

From concept to system decomposition, software development, Software Safety Specification and requirements allocation... [More details](#)

How to apply IEC61508 for mechanical devices (DE0104)

Functional Safety in general and relevant standards, functional Safety for mechanical parts, mechanical parts according to ISO 13849-1... [More details](#)

Introduction to ISO 13849, Safety of machinery – Safety related parts of control system (DE0303)

Introduction to Functional Safety, Safety Functions in the scope of ISO 13849, Safety Integrity, Risk Reduction and estimation of Performance Level... [More details](#)
